

CARBON CALORIES

WHAT GETS MEASURED
GETS MITIGATED

Consumer-centric product carbon statements for responsible brands

CARBON STATEMENT
T-SHIRT (LOW)

GENERAL SPECS
Fabric: Minimum-/Zero-till Cotton
Washer: Energy Star Certified
Electricity: Renewable
Use: Machine wash/hang dry
Lifespan: 50 uses

CARBON EMISSIONS PER USE (CO₂e*)

PRODUCTION STAGES	70 g
Pre-manufacturing	64 g
Product manufacturing	21 g
Product distribution	33 g
CONSUMPTION STAGES	10 g
Transport (retail to home)	6 g
Washing	0 g
Hang dry	5 g
End-of-life disposal	0 g
DAILY CARBON QUOTA**	1 g
	0.4%

CARBON CALORIES

* Carbon dioxide equivalent (CO₂e). Other greenhouse gas (GHG) emissions, if any, are converted into CO₂e using global warming potential (GWP) conversion factors. For more information see: The Carbon Compendium.
** In the year 2020, the Daily Carbon Quota per #GlobalCitizen is 18,668 gCO₂e. For more see: The Carbon Budget.

SUBSCRIPTION OFFER

These are Carbon Calories' exclusive subscription terms for early subscribers through ReCLothe.

1. Brands must sign up to become subscribers of Carbon Calories' SaaS to be released in 2023.
2. Brands will get one Product Carbon Footprint and product page as detailed herein (next page).
3. Brands that sign up *and* execute the non-binding Subscriber LOI will get early access to the SaaS.

PRODUCT CARBON FOOTPRINT

Brands get ten carbon assessment when they sign up to be early subscribers of Carbon Calories' SaaS (previous page).

1. **Download** the Apparel Compilation or Redacted Model inked in Guidance
 - a. Apparel Compilation itemizes compilation by sheet/tab (we think this may be easiest);
 - b. Redacted Version has only direct field inputs;
 - c. Neither generates real-time results
2. **Enter** product-specific inputs¹
 - a. Refer to the Guidance for instructions regarding data compilation for the Carbon Calculator
3. **Custom emission factors?**
 - a. You can enter your own emission factors for raw materials, if you have them
4. **Send** to Carbon Calories
 - a. The turnaround is five to ten days if and when all inputs are complete
5. **Receive** your PCF Report and product page with Carbon Statements on Carbon Calories' website²

-
1. Including fabrics, components, origin locations, final sale destinations, mode(s) of transport, packaging, waste-handling, etc.
 2. Including an icon, high-resolution PNG, QR code, and a product-page on Carbon Calories' repository (CS × Sampler) for a single (one) Carbon Statement for the associated product (it will not include Low/Base/High scenarios nor a Collation).

BRAND BENEFITS

Be a trendsetter in transparency.

Increase Sales

Acquire — engage new customers by building trust

Retain — 70% of customers support carbon footprint labels

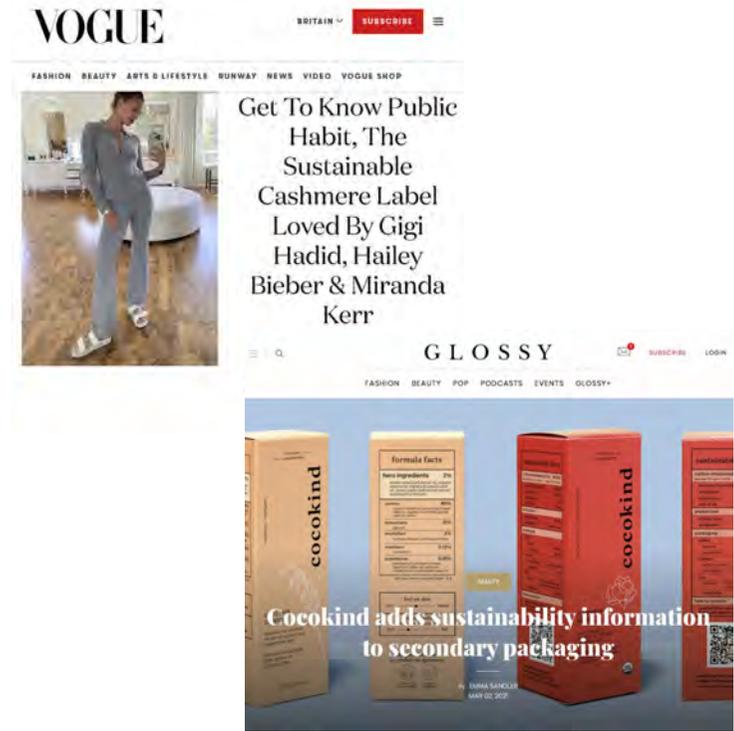

Build — brand loyalty with Gen Y/Z (30% will pay more)

Win Customers

Differentiate — your brand versus non-disclosing brands

Share — progress on your sustainable, low-carbon journey

Bank — trust with your customers

CARBON STATEMENT COMPARISON			
T-SHIRT

TRANSPARENCY

Every single product has a quantifiable carbon footprint.

AGENCY

Our statements empower both consumers and producers to mitigate their carbon-emissions impact.

MEANING: WHAT IS 228g?

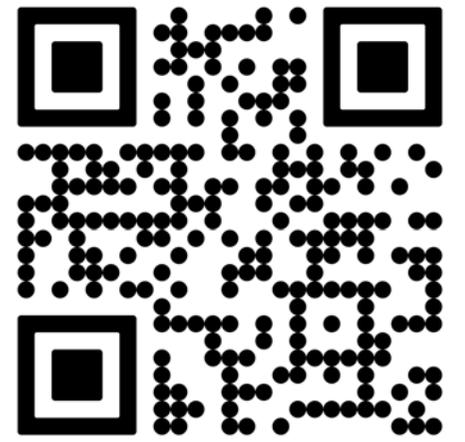

Our statements contextualize the carbon footprint of products:

- They exist within the framework of a yearly Carbon Budget for the entire planet, meaning there is a direct relation between the carbon footprint and how it impacts our Planet
- They allocate this budget to you individually, on a daily basis: the Daily Carbon Quota
- They show you what fraction of your daily quota the product consumes

Our statements are cross-comparable:

- Our calculation methodology allows us to compare any kind of product on equal footing
